

David Lawful and Marc Gilutin Memorial No Limit Hold'em Crapshoot Tournament Structure

Time: Monday, July 17, 2023 at 6:00 pm
Initial Chips: T10000
Rounds: All levels are 15 minutes. 9 handed tables.

During the first hour, unlimited rebuys of T10000 are available for \$60 to players with less than T10000. All players may add-on for \$60 at the first break. Instead of being added to the prize pool, all rebuy and add-on proceeds will be donated to the winner's choice of Bicycle Colorado, the Hudson Event Center, Child's Play, or Game to Grow.

No Limit Hold'em Crapshoot plays like regular No Limit Hold'em, except in lieu of a turn card, the button rolls two dice. The roll of the dice represents the value of the rank of the turn "card" (a value of 11 is a Jack, a value of 12 is a Queen, and the turn "card" can never be a King or an Ace). The turn "card" has no suit UNLESS: (a) craps (2, 3, or 12) is rolled in which case the turn "card" plays as any suit, (b) hard four (2-2) or six (3-3) is rolled in which case the turn "card" plays as any black suit, or (c) hard eight (4-4) or hard ten (5-5) is rolled in which case the turn "card" plays as any red suit. If the button rolls a 7 or 11, they win a big blind from the pot (if the player was all in, winning the big blind from the pot makes them no longer all in pending turn and river action). If the button rolls craps (2, 3, or 12), they must pay two big blinds to the pot (unless they are all in).

Each hand the big blind will post an ante equal to the amount of the big blind. If the player in the big blind does not have enough chips to post both the ante and the big blind, the big blind will be posted before the ante. When the final table reaches four handed play, the ante will be reduced to the amount of the small blind.

Late registration will be allowed until the end of the first break (or later at the discretion of the Organizers).

For All BARGE Poker Tournaments: To facilitate table balancing and fairness, a player chosen to move to balance a table will be selected based on position from the button instead of from a random draw.

Chip Races: No one will be allowed to bust out in the chip race. Anyone in such danger will receive one higher denomination chip.

There will be a five minute break and redraw of seats for the final table.

Game Rules

California Lowball is played with a 52 card deck plus a joker, which plays as the lowest non-pairing card in the player's hand. Each player is dealt five cards face down, followed by a round of betting at the lower limit. Then each player in turn discards zero to five cards from their hand. Once all of the discards have been announced, the dealer will deal each player an appropriate number of replacement cards. This is followed by a round of betting at the upper bet limit, and then a showdown with the lowest hand winning. Aces are always low, and straights and flushes do not count against for evaluation of the best hand. The best possible hand is a wheel (A2345).

Note that for this tournament, **check raising is allowed, and the Sevens Rule will not be in effect.**

For All BARGE Poker Tournaments: To facilitate table balancing and fairness, a player chosen to move to balance a table will be selected based on position from the button instead of from a random draw.

Chip Races: No one will be allowed to bust out because of the chip race. Anyone in such danger will receive one higher denomination chip.

There will be a five minute break and redraw of seats for the final table.

Coney Island Whitefish Memorial CHORSE Tournament Structure

Time: Wednesday, July 19, 2023 at 9:00 pm
Initial Chips: T16000

Levels 1-3 are two orbits of each of the two games per table. Level 4 is 12 total hands consisting of two rotations through CHORSE (starting with C), playing one hand of each game in order. Level 5 is one hand per remaining team with each team choosing which game to play for one hand.

Level	Antes	Bring-in	Blinds	Limit
1	25	25	75-150	150-300
2	50	75	100-200	200-400
3	75	100	150-300	300-600
4	100	150	200-400	400-800
5	150	200	300-600	600-1,200

Rules for the Team CHORSE competition

1. In the event of any discrepancy in the rules, CHORSE director Kevin Un's decision will be final.
2. Each team will consist of six players, and each player will play one of six games: Crazy Pineapple High/Low, Hold'em, Omaha High/Low, Razz, 7-Card Stud, and 7-Card Stud High/Low.
3. The event cost is \$480 per team. This entry fee includes T16000 in tournament chips each with a cash value of 2.5 cents (\$400), a prize for the first place team (\$40), and house and staff/dealer fees (\$40). No rebuys will be permitted. Toking during play is encouraged but not required. Tokens collected at the end of the tournament will be given to the floor.
4. Each team will be in play on three tables at one time. The first table will feature Hold'em and Omaha/8. The second table will feature Razz and Stud. The third table will feature Crazy Pineapple and Stud/8. At the end of each level, each team's chips will be combined, then divided as equally as possibly among their three tables.
5. This year the game order will be: Omaha/8 then Hold'em, Stud then Razz, Stud/8 then Crazy Pineapple.
6. Seating assignments will be determined by random draw prior to the event. The button will start in seat 1.
7. The button rotates through all seats with chips. After two orbits are complete, players for the next game will rotate in. Normal Las Vegas button moving rules will be used (the button is positioned on the player who was the last to pay a small blind).
8. Maximum 9 teams per table. Tables will pause synchronize their play at the end of each round. Tables will be balanced to equal size at the end each round, if necessary.
9. In 7-Card Stud ONLY, if there is an open pair on 4th street, a player may make a double-sized bet.
10. If there are more than 9 teams at the start of the tournament, the tables are combined if/when the total number of teams reaches 8. Once this threshold is reached, each table finishes its current orbit, new seats are drawn for the final table, and play resumes at the same point it left off.
11. During the first two levels of play, teams may use alternate players (i.e., players not on their official roster of six players). Alternates may be allowed during later rounds at the discretion of the tournament director.
12. No alternate player may play for more than one team.
13. No player may play more than one type of game.
14. If a player is absent, they are still responsible for the blinds/antes.
15. At the end of level 3, the top six teams in chip count will proceed to the official CHORSE final table and level 4. Any remaining teams will be eliminated and cashed out.
16. Beginning in level 4, ALL team members may participate in ALL hands if they so choose.
17. After the completion of the 12 hands that make up level 4, level 5 will be played. Level 5 consists of a number of hands equal to the number of teams remaining. Beginning clockwise from the dealer, each team will select one CHORSE game to play. There will be a chip count after each hand. After the final hand, the team with the most chips will be declared the winner and (1) have their name engraved on the perpetual CHORSE plaque, (2) win the CHORSE trophies, and (3) win the first place cash prize.
18. At the end of the tournament, or when a team is eliminated, each team will receive \$1 in cash for each T40 they have remaining.

3 Hand Hold'em Tournament Structure

Time: Thursday, July 20, 2023 at 10:00 am
Initial Chips: T10000
Rounds: All levels are 20 minutes. 6 handed tables.

Players are dealt 6 cards and separate them into three 2 card Hold'em hands. Once the 3 hands are set, they cannot be changed. Thereafter the game plays like Hold'em, except that each remaining player discards one hand after the flop (before the betting) and another after the turn (before the betting), leaving players with only one hand going to the river.

Late registration will be allowed until the end of the first break (or later at the discretion of the Organizers).

Any number of lammers may be converted to tournament chips between hands. For example, they may both be cashed in at the beginning of the tournament to create a T20000 stack, or they may be cashed in one at a time after the player loses his or her stack, or any combination in between. If a player busts and has both lammers remaining, they may redeem either one or both before the next hand. If not used earlier, all lammers must be cashed in at the end of level 12.

*The "Raise To" column assumes that you are first to enter the pot after the blinds pre flop. The maximum raise is determined by the size of the pot, after first adding your implied call of the action to you. The minimum raise is the size of the last blind or raise.

For All BARGE Poker Tournaments:

To facilitate table balancing and fairness, a player chosen to move to balance a table will be selected based on position from the button instead of from a random draw.

Chip Races:

No one will be allowed to bust out because of the chip race. Anyone in such danger will receive one higher denomination chip.

There will be a five minute break and redraw of seats for the final table.

Game Rules

Korean: Korean is a split pot triple draw game player with blinds and qualifiers of any pair for high and any unpaired hand for low. Korean hands are A-5 lowball style, and flushes/straights do not count against the low hand. If there is no qualifying hand in one direction at showdown, the entire pot is awarded to the best hand in the other direction.

Mexican Poker: Mexican poker is a five card stud game player with antes. A deck of 41 cards is used with the 8s, 9s, and tens removed and a joker added. Flushes outrank full houses; otherwise, standard poker hand rankings apply. Straights continue through the stripped cards (e.g., 567JQ is a straight). If dealt face up, the joker plays as a bug (*i.e.*, an ace or to complete a straight or flush). If dealt face down, the joker is *completely wild* (even if it is later turned up).

All players ante. Beginning to the left of the dealer, players are dealt one card face down and one card face up. The player with the high card by suit (the joker is the highest ace) must make a forced bet at either the upper or lower betting limit. If the lower bet is made, players may raise in the amount of either betting limit (all raises must be at least equal to the size of the last bet). Then each player must decide whether to receive their next card face up, or to expose their down card and receive their next card face down. Players receive their cards, followed by a round of betting beginning with the highest hand showing, who can check or bet either the upper or lower limit; then each player must decide how to receive their next card. This continues until the betting round after each player has five cards is complete, followed by the showdown.

For All BARGE Poker Tournaments: To facilitate table balancing and fairness, a player chosen to move to balance a table will be selected based on position from the button instead of from a random draw.

Chip Races: No one will be allowed to bust out because of the chip race. Anyone in such danger will receive one higher denomination chip.

There will be a five minute break and redraw of seats for the final table.

TOC-Style Tournament Structure

Time: Friday, July 21, 2023 at 10:30 am
Initial Chips: T15000. 8 handed tables.

During levels 1-12, two of the three games will be played. Hold'em rounds will be 15 minutes, Stud rounds will be 18 minutes, and Omaha/8 rounds will be 22 minutes. Level 13 onward will be No Limit Hold'em with 20 minutes levels.

For each hand of the No Limit Hold'em rounds, the big blind will post an ante equal to the amount of the big blind. If the player in the big blind does not have enough chips to post both the ante and the big blind, the ante will be posted before the big blind. When the final table reaches four handed play, the ante will be reduced to the amount of the small blind.

Late registration will be allowed until the end of the first break (or later at the discretion of the Organizers).

The table above is designed with the following necessary constraints:

- The last paying place always assures the participant of getting at least his money back.
- A higher place never pays less than a lower place in a given tournament.

The table above is also designed with the following arbitrary constraints:

- As the number of players increases, the percent of the field being paid is reduced, heading asymptotically to 10%.
- As the number of players increases, the percentage of the payout for a given place must not increase.
- As the paying place becomes worse, the number of players receiving the same payout will not decrease.
- For a given place, the gap between that payout level and the one above it must never be lower than the gap between a given payout and the one below it.
- For a given place as the number of participants goes up, when the payout percentage drops, the amount it drops must not be a greater amount than for any previous drop for a smaller number of entrants.
